Add-on License Inquiry (XASYSINQ).....	2

Common Element Overview

The Common Element patch must be applied to any Sage ERP X3 system in which the North American add-ons will be installed. This patch contains important internal files and prerequisite setup required for the successful installation of any of the feature based add-ons (see list below).

- XA01 – Automatic data Collect (ADC)
- XA11 – Shipping system
- XA14 – Import Track / Container Mgmt
- XA16 – RF warehousing
- XA18 – Bill of lading (BOL)
- XA22 – Allergens
- XA26 – Shop floor control (SFC)
- XA32 – AR lockbox

Add-on License Inquiry (XASYSINQ)

The add-on license inquiry provide a quick way for a partner/customer see/validate information about their Sage ERP X3 system, current folder and the add-ons that have been licensed. The inquiry provides the following:

System information:

- *Version* – Display of the current software version
- *Patch level* – Display of the latest patch level that is present
- *Data server* – Name/location of the data server
- *Database* – The name/version of the database software in use

Folder attributes:

- *Name* – Name of the current folder
- *Test* – Display of the folder setting
- *Specific* – Display of the folder setting

NA Add-ons

- *Activity code* – Add-on activity code
- *Title* – Description of the add-on
- *Active* – Display indicating active/inactive
- *Licensed* – Display indicating if the add-on is licensed

The add-on licensing information that is displayed should match the software that you have purchased. If a feature you have purchased does not display as active, please consult with your Sage ERP X3 system administrator as this may be an indicator of an installation problem. If a purchased feature displays as active but not as licensed, please check with your Sage ERP X3 sales contact as there may be a problem with the license key.
